Description

Bolle ski helmet. The Ryft helmet has a trendy green design with a matte appearance. The green helmet has a white brand logo. It stands out for its functional features, which make it a suitable choice for downhill skiing for everyone. The ski helmet has an adjustable helmet ventilation system thanks to AIR FLOW EXTRACTOR technology. You can adjust the size using the patented CLICK TO FIT system.

Thanks to AVID PROGRESSIVE EPS technology, the Bolle ski helmet ensures greater impact resistance. The Deluxe inner padding is extra comfortable and removable and can be washed at 30 degrees. The Bolle Ryft helmet has a durable DOUBLE INMOLD hybrid construction with EPS. Removable 3D ear covers, so-called REMOVABLE 3D EAR PADS, are also an advantage. The practical CHIN STRAP allows individual adjustment under the chin. There is also a clip on the back for attaching ski goggles.
