Description

Asics women's shoes. Women's running sneakers appeal with a stylish sports design in modern colors. In these running shoes, you will definitely impress at every training session. Dynablast 3 running shoes are designed for fitness lovers who are looking for comfortable shoes for running or training. Asics sneakers are a support for sports.

The running shoes have classic lacing, which makes the sneakers adapt to the foot very well. The classic cut is suitable for every type of foot. The upper part of the running shoes is made of a mesh material that allows for excellent air ventilation. At the same time, it is reinforced by a notched construction of the tongue, which helps reduce pressure points on the tread. This will create a smooth and soft feeling under your feet. The comfortable OrthoLite™ X-40 insole provides soft comfort. Blast suspension provides excellent damping, sensitive reflection and shock absorption. The AHARPLUS™ rubber sole is highly durable and non-slip. Brand sneakers are must-have footwear for sportswomen who like running, comfort and style. They were also made from recycled materials.
