Description

Nike women's shoes. Trail shoes are designed with excellent grip and stability. Whether it's a tough, rocky uphill climb or a steep, slippery descent down a treacherous trail, these Nike boots will ensure confidence when you decide to hit the terrain. The upper of the women's running shoes has fine perforations for a higher level of breathability. Brand boots are nice to have footwear for sports-active women.

The plus of the trail shoes is the Nike ZoomX technology, which will ensure great suspension and cushioning. The sole guarantees excellent grip and traction. Nike brand sneakers are a great choice for running on unpaved terrain, in the forest and on dirt roads.
