### Description

Salewa women's shoes. High hiking boots in a modern design stand out for their functional features. Women's hiking boots in a bold color will attract attention at first glance. The durable leather upper in combination with the textile part ensures excellent air circulation. The cut of trekking shoes is the maximum support when moving in the terrain. Women's mountain shoes have a light construction. The main advantage is the Gore-tex membrane, which guarantees protection against rain and moisture. Trekking shoes have a 3F system that supports the ankle and flexibility when walking.

Outdoor shoes for ladies can conquer any hiking trail. Thanks to classic lacing, they fix the foot well. Reinforced toe and heel ensure durability and protection of the foot. The soft insole ensures comfort when wearing. Ortholite shoe insert reduces leg fatigue. Brand shoes are the best companions for the forest, for trekking, outdoor adventures and tourist expeditions.
