Description

Volkl brand skis. Racing skis have great equipment, known from Racetiger skis, which is also 3D GLASS. Racetiger skis are flexible, have a wooden core in a sandwich construction, reinforced with a steel shell and sidewalls along the entire length.

The Rocker profile makes it easier to drive through bends. The advantage is the geometry with a smaller turning radius. The VMotion binding with the Grip Walk function adds dynamics to the skis and, most importantly, provides more stable handling of the skis in difficult snow conditions.

Binding is included in the price of the skis.
