**Description**

Vans men's shoes. Men's shoes impress with their modern yet timeless design. The upper is made of suede in combination with synthetic material for a higher degree of resistance. The tip is reinforced with additional material for better protection of the toes. The back side of men's shoes is also reinforced. Classic lacing guarantees excellent fixation of the foot. The side of the branded shoes is decorated with the Vans logo.

Vans shoes have a soft insole and a padded shoe collar, which allows for super comfort when wearing. The OrthoLite® insole, which reduces foot fatigue, also contributes to comfort. The UltraCush™ EVA midsole guarantees very good cushioning. The plus are the loops that will help when putting on and taking off shoes. Black Vans shoes are reliable companions for the city, work, everyday wear and leisure activities.
