**Description**

Tecnica men's shoes. Tecnica winter boots are suitable for men who do not want to give up an active lifestyle even in winter. The shoes have a high cut and will perfectly protect you from the cold even in adverse conditions thanks to their functional properties. Men's winter boots have a durable upper made of hydrophobic polyester fabric, which is waterproof thanks to the Gore-Tex membrane and provides comfort even in the rain. Men's winter footwear also stands out with its rugged anti-slip sole. Thanks to it, trekking shoes have excellent grip even on frozen or snow-covered pavement.

Men's winter boots are tied with drawstrings. In the upper part, the laces are supplemented with hooks, for a better and more secure attachment. Tecnica shoes are a recommended choice for the slopes, for snowy nature or as apres-ski shoes. A bonus is the warm lining inside, which will keep your feet pleasantly warm. The midsole made of light EVA foam, which provides cushioning, also contributes to comfort during wear. Men's warm boots have a reinforced toe. The specially designed sole will improve your grip on slippery sections. The loop on the back makes it easier to put on the men's hiking boots. The model is 100% vegan.

**Product details:**

- men's winter footwear
- high cut
